DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-72, drawn to a molecular model of an amino acid, classified in class 434, subclass 278.
 - II. Claims 73-102, drawn to a molecular model of a nucleic acid, classified in class 434, subclass 278.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are models of different types of molecules, with different fundamental structures and methods of creation. The two types of models are not embodiments of the same fundamental invention, but rather represent two separate and distinct types of models, and thus two inventions.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper. Also, while both inventions are drawn to the same class and subclass, a proper search for each of the inventions would require

a substantial search of non-patent literature, as there is not a great deal of related prior art in the patents; thus, it would be an undue burden on the examiner to search all claims in both groups.

4. A telephone call was made to Raye L. Shaffer on April 4, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kurt Fernstrom whose telephone number is (703) 305-0303.
